

ACTION TAKEN REPORT ON STAKE HOLDER FEEDACK A.Y. 2022-23

Date: 28-03-2023

Action to be taken on the various feedback report collected from stakeholders from time to time along with suggestions.

Action suggested on Students Feedback report

Students said about number of optional subjects available and also about the real time applications. The students highly appreciated the academic related infrastructural facilities such as library, laboratories, playground and other facilities. The analysis of the students' feedback clearly depicts that they are well satisfied with the curriculum development and revision.

Suggestions: Faculties are advised to cover the syllabus and plan for additional classes as and when required so as to see that the syllabus is covered on time. Review of syllabus is to be carried out based on more technical knowledge.

Action suggested on Alumni Feedback report

Alumni were focusing on infrastructure and placement facilities. They want more technical training programs to be conducted and also want the syllabus to be as per the industry requirement. The alumni feedback analysis report reveals that majority (100%) of the alumni are happy and proud to be a part of this institution and they agreed that they would recommend their friends and relatives to enroll in this institution.

Suggestions: Pre-Placement Training classes duration should be increased. Placements for students should be improved by placing the more students.

Action suggested on Employer Feedback report

An employer wanted the syllabus to be more oriented toward the current trends in the industry and also wants to have a particular period for improving communication skills of the students. They highlighted the importance to improve upon the domain knowledge to meet the emerging societal needs.

Suggestions: Principal and Heads were asked to arrange more training programs so as to prepare students for the placements.

Action suggested on Teachers Feedback report

As per the feedback, more teachers were asking for modifications in certain part of the syllabus so as to make it market friendly and the student as market ready. The analysis of the teachers' feedback reflects the adequacy and availability of teaching-learning facilities. The feedback from the teachers revealed the validity and adequacy of the syllabus. Also, it is quite helpful in reframing the course content according to the societal needs.

Suggestions: The intention was to see that the student completing the course should be ready to perform in the job for day one. Also, the focus on imparting real time applications was pointed out. So, the decision is made to see that the modifications required are to be written to BoS in the University requesting to make the changes based on overall feedback.
