Department of Management studies Management Concepts Summary

In general OD efforts are designed to bring changes in the conceptual environment of an organization as well as in the outlook of the organizational members. Each member begins to see himself as a resource to others and is willing to lend his support to his colleagues when it is needed. The conceptual environment brings about open and free expression of feelings, emotions and perceptions. The change must be for the better so that it develops the organization and such organizational development should be directed towards improvement in organizational health and welfare of the members. The basic purpose of such development is to improve the operational as well as interpersonal skills of employees and it also helps members to develop interpersonal competence including communication skills and an insight into themselves and others. It improves communication channels at all levels of the hierarchy and build team spirit among workers as that their inter-group relationships are highly cordial.
