DEPARTMENT OF CIVIL ENGINEERING

CIRCULAR

The Department of civil engineering is organizing a one day workshop on “**REVIT SOFTWARE**” on 14th sep, 2017.

In this connection I request you to circulate this among Teaching Staff of your department.

Report of workshop

On

REVIT SOFTWARE

Date of seminar 14-SEP-2017

Name of the expert: Mr. Srinivas

Autodesk Revit is building information modeling software for architects, landscape architects, structural engineers, mechanical, electrical, and plumbing (MEP) engineers, designers and contractors. The original software was developed by Charles River Software, founded in 1997, renamed Revit Technology Corporation in 2000, and acquired by Autodesk in 2002. The software allows users to design a building and structure and its components in 3D, annotate the model with 2D drafting elements, and access building information from the building model's database. Revit is 4D building information modeling capable with tools to plan and track various stages in the building's lifecycle, from concept to construction and later maintenance and/or demolition.

Charles River Software was founded in Newton, Massachusetts, on October 31, 1997, by Leonid Raiz and Irwin Jungreis, key developers of PTC's Pro/Engineer software for mechanical design, with the intent of bringing the power of parametric modeling to the building industry (PTC had previously tried and failed to market its recently acquired Reflex software to the construction sector).^[1] With funding from venture capitalists Atlas Venture and North Bridge Venture Partners, Raiz and Jungreis hired several software developers and architects and began developing Revit in C++ on the Microsoft Windows platform. In 1999 they hired Dave Lemont as CEO and recruited board members Jon Hirschtick, founder of Solid Works, and Arol Wolford, founder of CMD Group.
